MATERIAL 1B

WHY DO THINGS HAPPEN THE WAY THEY DO? WHAT EXPLANATORY MODELS ARE THERE?

GOD > A force which can influence courses in the life of every being in every direction.

COINCIDENCE> Things happen, because certain conditions came together "by chance", unplanned and unintentionally.

FATE > An unknown power that influences life in a predetermined way.

KARMA (literally "action, deed, activity") > the effect of deeds, words and thoughts (also from previous lives) are the causes of what man experiences.
